Drew,

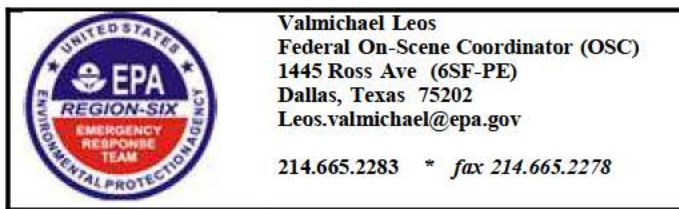

I'm alive and unhurt. Yeah, this unexpected visitor certainly delayed my site inspection Wed. He kept following my rental car when I moved it. I told him to leave or I'll call the cops, but he ignored me. He was pretty disoriented, no shoes, and arms were all bloodied up.

I ended up leaving the site, parking, and waiting for cops to arrive. The cops finally did and took him away. TXDOT is aware of this trespasser.

Hey David, this guy asked for you by name. Do you have any friends around here? Hahah J/k

On a serious note:- On my inspection report I will mention the trespasser and the fact I didn't notice any holes in the security fencing. I didn't walk the entire fence line. Given this recent security breach, I am going to recommend you all walk the entire fence line and double check. This guy may have climbed and jumped the fence which would explain all the blood on his arms cut up from the barbed wire. Who knows?

If you have any questions please don't hesitate to call.

Since I received your email, I take it that you made it out of the site alive. Did Harris County Sheriff ever show up?

Valmichael – It looks like October 14th or October 15th are the two days that will work best for us in regards to scheduling a conference call to discuss the findings of the USACE review of the TCRA design. Please let me know a good date and time for your folks, and if you would like for me to set up at WebEx meeting. Could you please also confirm that this is a technical team call only?

Thanks,
David

David,

I've recieved the Draft Final Report from Paul with the USACE early last week. EPA is in the process of an internal review prior to making the document final. I suspect we will need about two weeks to complete this review. Once the review is complete we will be issuing your clients with IP and MIMC a letter with the findings of this report. Prior to issuing the letter, the EPA would like to schedule a short conference call to discuss with you and your clients the findings of the report. Please check your availability the week of October 14th.

-Sincerely
Valmichael Leos

Valmichael – Any update on EPA's progress on the reassessment report? We would really like to get any feedback that we may need to consider for the FS that is due to EPA on August 30th as soon as possible.

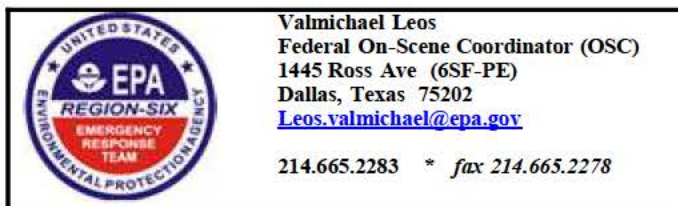

Thanks,
David

David,

I'm working on getting a Final DRAFT report from the USACE this week. I'll keep you posted when I'm ready to set up that conference call to discuss the results of the report.

-Val

Subject: Checking In

Valmichael – I trust your summer is going well. I wanted to check in and see if we should expect any feedback from EPA on the reassessment activities that you completed with USACE, or if you felt like you needed any additional information from us.

Let me know how things are going when you get a chance.

Thanks,
David
